Issue 33

June 2016

Quote of the Month

Three men were laying brick.

The first was asked: "What are you doing?" "He answered: "Laying some brick."

"The second man was asked: "What are you working for?"

"He answered: "Five dollars a day."

"The third man was asked: "What are you doing?" "

He answered: "I am helping to build a great cathedral."

" Which man are you? Charles M.Schwab

AUTOMOTIVE

For the first time, AUTOMECHANIKA is being held in the UK this year, from 7th to 9th June at the NEC, Birmingham. Hepworth International will be exhibiting some of their latest automotive products on Stand No. 11 L 40 where their technical design and engineering team will be able to discuss our high quality production capabilities.

SMMT Open Forum and SMMT meet the buyer which we will be attending will be held at the exhibition.

Hepworth Automotive's Technical Sales Manager, Tom Dunkley, attended the London Motor Show earlier this month which has made a welcome return to the capital after too long an absence. The all-new annual event attracted over 25,000 visitors, hosted 130 new car models from more than 40 brands and saw some of the UK's best known dealer groups talking to prospective customers.

Opened by patron HRH Prince Michael of Kent and held at the Battersea Park Evolution Centre, the show was a resounding success appealing to a broad demographic, with a good cross section of dealers from niche specialists and regional family groups to some of the biggest names in the Motor Trader Top 200.

Tom Dunkley stated: "*This was the first Motor Show held in the UK since 2008, held in the idyllic surrounds of Battersea Park, London. It was great to see so many British manufacturers under one roof. The stands were full of exciting new models and outlined the strength of British Design and Manufacturing. The plans to continue the show annually are a great start to having a show that competes with the world's established Motor shows.*"

Other key events include the Made in The Midlands Expo – Held at GTC Training centre, Wolverhampton during May.

On the 25th May, Tom Dunkley will be attending the SMMT Automotive components section meeting held at the JLR Castle Bromwich plate. The day will consist of Networking, Presentations and a factory tour.

FABRICATION

For the first time Hepworth Fabrications will be exhibiting at Subcon 2016 held at the NEC, Birmingham, during 7-9th June 2016. Please visit us on Stand: H42, Qimtek Pavilion.

Hepworth Fabrications recently supported an A-Level student in his Design and Technology project, by supplying a laser-cut logo free of charge. He asked:

"I am currently undertaking an A-level design and technology project. For this project I have been commissioned by Robert Welch to fabricate a point of sale display. Subsequently, I was hoping to include the Robert Welch logo, laser cut from the centre of a mild steel sheet (980mm x 150mm x 2mm), the logo would have a height of 100mm. Is this something that you would be able to help me with, and if so how much would I be looking to pay for such a component?"

"Thank you very much for the powder coated logo, it looks brilliant and will be perfect for the project" Hugh Johnston, Student.

RAIL

The Rail team will be exhibiting at Rail Live on 22nd - 23rd June 2016 at Quinton Rail Technology Centre, Station Road, Long Marston. We will be located in the Rail Alliance Membership Marquee Stand No A11.

Hepworth Rail will also be exhibiting at InnoTrans 2016 Exhibition, which will take place in Berlin, during 20th – 23rd September 2016. Hepworth's specialised Rail and Design teams will be located in Hall A on Stand No. 402.

If you have any questions prior to the events, please do not hesitate to contact us.

MARINE

Kleven NB 373

A new offshore construction vessel, the Edda Freya, is fitted with Type D Wynn Straight line wipers. We also supplied the wipers for the drilling cabins on the vessel. The 150m long vessel is designed for cable laying, offshore construction and IMR operations, equipped to suit the Greater North Sea market and has accommodation facilities for up to 140 persons. It is going to work offshore Norway.

New Flugga boat.

An exciting new boat that Flugga is developing will be fitted with the Hepworth's 20Nm wiper system.

Designed to withstand the harshest sea conditions that surround the British Isles, Flugga Boats utilise plastic and aluminium materials to give strength, low maintenance and a long-life hull, thereby delivering an extremely low total cost of ownership over the life of the boats. Flugga specialises in police boats, dive boats and rigid-hulled inflatable boats that are used throughout the world, all built in Shetland.

Hepworth will be showing the **Monitor Marine International** range of high quality, precision engineered Stainless Steel Deck Hardware, including examples of deck fittings, interior and exterior hatch handles, plug-in connectors, smaller/lighter finger pulls, snapshot latches, plus the wide variety of helicopter tie-downs that they make.

Alongside the range of **Wynn Straight Line, Hepworth Pantograph & Pendulum performance wipers**, all are produced to the high standards of Lloyds Register, DNV, ABS and ISO 9001:2008, and can offer same day spares dispatch.

MONITOR MARINE

The first order for the Monitor Marine Pull-Up Cleats has been delivered and installed on a new RIB. Our customer was very pleased with the ease of installation, low profile and overall good aesthetics, and we have been told that they will now be fitting these cleats to all new builds!

We have also just received confirmation of our largest order to date for the 4-Bar Helicopter Tie-Downs, from one of the world's largest SuperYacht builders, with 45 units ordered!!

A lot of enquiries are being quoted for, including one for over 300 Multi-Purpose Connectors for installations in the Middle East to anchor Skypool covers for a large area, plus sales are being made of both the 1 Tonne and 3 Tonne Connectors to an increasing number of Tender and Toy suppliers.

After a successful visit the OTC Exhibition in Houston, further meetings have now been arranged with some of the leading manufacturers of Helidecks and Helipads where the use of our wide range of Tie-Downs are the most comprehensive designs available. A large offshore supply company based in Houston will be marketing our commercial range of Tie-Downs in South America, having already secured a significant contract with one of the world's largest oil & gas producers.

We will also be presenting Monitor at the forthcoming **SuperYachts – Meet the Buyer in Italy, 15-18th June**.

How did we do? - Newsletter Feedback

Hepworth would like to get a sense of how satisfied you are with our Corporate Newsletter. We are constantly striving to provide an excellent service to our customers and would appreciate your feedback.

- Would you like to see any other content in the newsletter?
- General thoughts?
- Is the content interesting and relevant to you?
- What is your overall impression of the newsletter?

We thank you for your comments in advance.

Show *ing* the way.....

If you would like to include any information in the future newsletters, please contact Gemma Pinfold, Marketing Department.
