
NEW STRAIGHT-LINE WIPER ARM

For blades from 1100mm up to 1975mm

The double arm assembly is designed for the larger window requiring a maximum to bottom coverage.

Where previously two wiper systems were necessary, top and bottom mounted to meet the coverage required, only one straight –line wiper is required. Bringing significant cost saving to the customer from initial planning through to wiper control cost, installation, commissioning and aftersales.

This new valued engineered and customer focussed design offers the following benefits.

- **Increased superior wiper area coverage**
- **Substantial system price reduction.**
- **Aesthetically and ergonomically improved.**
- **Integrated anti lift assembly.**

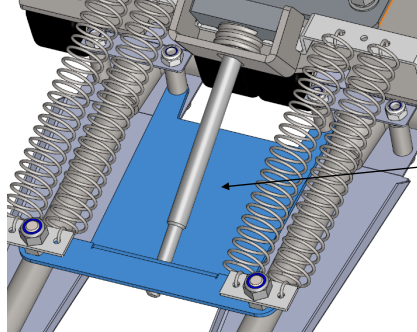

Compliant with DNV accreditation.

The innovative product design is backward compatible and will be available from October 2019.

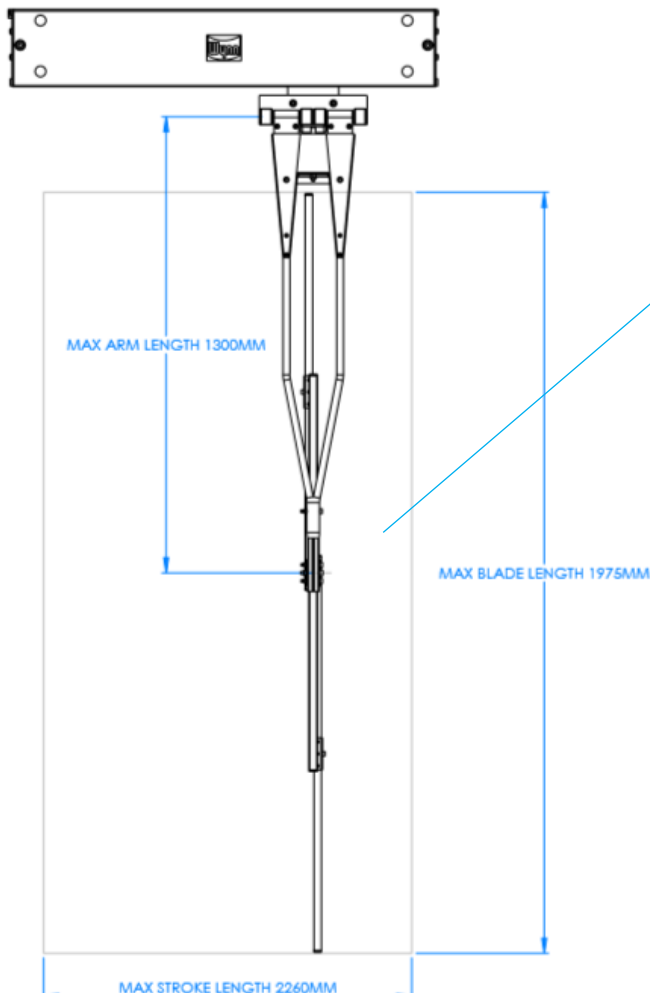

Type C & D Straight Line Wiper

IDEAL FOR LARGE OCEAN-GOING VESSELS OR VESSELS REQUIRING A MAXIMUM COVERAGE

Adjustable anti lift and spring support system

Benefits

Double blade configuration to guarantee equal pressure over the full length of the blade.
