
HEPWORTH NEWSLETTER MAY 2020

Scenic Eclipse

This elegant superyacht sports 15 of our Type D wipers with the 8000 series controller for the bridge and 3 Type C wipers with the 8900 series controller for the STRP bridge.

We are in process of supplying a second vessel but have been delayed due to the pandemic.

Stephanie Pasentine

This is the first Inland Towboat delivered by Metal Shark Boats. It is equipped with the Wynn Type D wiper and the 1000 series controller.

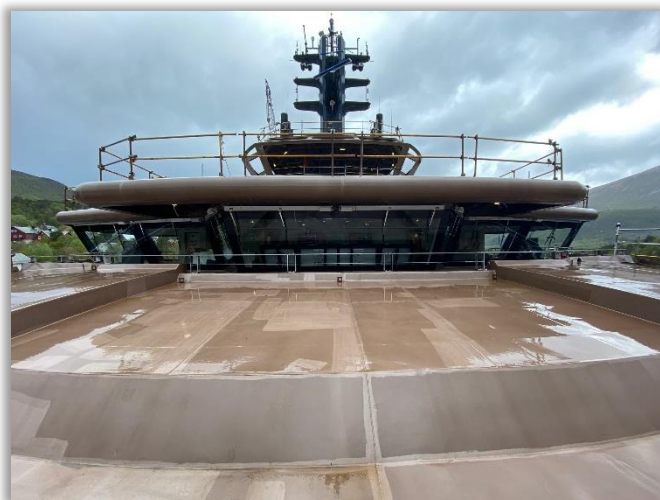

REV Ocean

We supplied 8 dual and 6 single of our Type D wipers that are now mounted on this research expedition Vessel.

REV Ocean is designed and constructed for Rosellinis Four-10, that is wholly-owned by the Norwegian industrialist Kjell Inge Røkke and his family. REV is developed by Vard Design in collaboration with the customer and the designer Espen Øino.

The highly specialized vessel is tailor-made for worldwide research and expedition activities, with the objective of developing knowledge and sustainable solutions to address the ocean's environmental challenges. WWF Norway is invited by the shipowner to take part in the further development of the research and expedition project.

Equipped with the latest technology on board, the vessel is one of the most advanced research expedition vessels in the world. Equipment for monitoring and surveying marine areas, currents, the seabed, fish, animals, and plant life in all of the world's oceans will be available on the vessel.

*“Success is not final; failure is not fatal:
It is the courage to continue that counts”.*

-Winston Churchill
