1. MSV Next Generation Landing Craft

The nearly billion dollar contract to build MSV(L) was awarded to Vigor in October, 2017.

The U.S. Army Next Gen Landing Craft MSV has a Wynn Straight Line Type D, 2x 50Nm Pantographs, and a 8224 controller on board, supplied to Vigor by [InMar](#).

2. Helicopter Securing Package

Monitor Marine now offers an end-to-end Helicopter securing package to complement our deluxe Helideck Tie-Down fittings. Recently we were presented with the final prototypes of Superyacht version of the renowned MC1 Lashing Strap developed by the UK-based Drallim Group. This lashing solution perfectly complements the Monitor range of Tie-Downs with its all-stainless construction and level of finish.

While the Superyacht lashing still offers the same certified load-rating as before, this new fitting is engineered from a specialised range of high-tech stainless alloys. In its new incarnation the Superyacht lashing offers twice the service-life as its NATO-certified sibling but opens up a variety of new options

for bespoke finishes to match the vessel it is supplied to.

As the ideal accessory to Monitor Marine fittings, Drallim's Superyacht Lashing strap continues the statement of luxury from the vessel's deck right up to the tethered aircraft.

3. Fabrications Art Project

Over the past weeks Hepworth Fabrications have been working on a unique project for The Artist, Luke Burton.

4. Rail

The Rail team have carried on upgrading its testing facilities where endurance and life cycle testing takes place. Improvements to layout are continuing to be made as the wipers are running their continuous cycles. We look forward to demonstrating this process and our facilities in the new year.

The project is called 'The Connection', and it will be the world's largest work of Art with many installations. The project also aims to act as a network to bring people and communities together, working with a number of recognised Charities.

The sculpture was conceived & designed entirely by Luke Burton; and B Hepworth have been delighted to have played our part assisting the manufacturing for such a fantastic and worthwhile project.

You can read more about the project here
