USCGC Robert Goldman

The USCGC Robert Goldman, Patrol Forces Southwest Asia's second Sentinel-class cutter, was commissioned into service at Coast Guard Sector Key West. The fast response cutters are designed to patrol coastal regions and are operating in an increasingly expeditionary manner.

They feature advanced command, control, communications, computers, intelligence, surveillance, and reconnaissance equipment and launch and recover standardized small boats from the stern. Robert Goldman has Type C Straight Line Wipers and 1000 series controllers.

George M Tugboat

Bay-Houston Towing Co. has taken delivery of the Robert Allan Ltd. designed Z-Tech 30-80 tug George M in early January 2021. George M

is the last vessel of the batch after the first tug Mark E. Kuebler was delivered in 2019.

On board are two 50Nm Type 1850 wipers with inboard arms. The wipers are operated by two 24V Multifunction switch panels with 2-speeds and an intermittent wipe and automatic parking. There are also two 24V Auxiliary Power Relays. These are all supplied by our United States supplier [Inmar Systems](#).

MV Jared Phillips

The mv. Jared Phillips is the fifth overall towboat built at FMT Shipyard, the vessel repair and construction arm of Florida Marine Transporters. The vessel was completed February 13 and departed the New Orleans area on February 18. Vessel design is by Gilbert Associates Inc. The vessel primarily will work on the Black Warrior-Tombigbee Waterway, transporting coal and other cargoes between Birmingham and the Port of Mobile.

[Inmar Systems](#) supplied a Type D Wynn Straight Line Wiper with a case heater, and the 1000 Controller.

Qamun ATB

The petroleum barge is specifically designed for the Alaska fuels market and will be paired with a tugboat. The ATB will head to Alaska to deliver clean fuel products in the western part of the state.

The ATB will be able to operate in ice and temperature conditions common during the Alaska winters with the help of 6 of our Wynn Type C Straight Line Wipers, and 6 Type 1000 Controllers, supplied by [Inmar Systems](#).

Coral Geographer

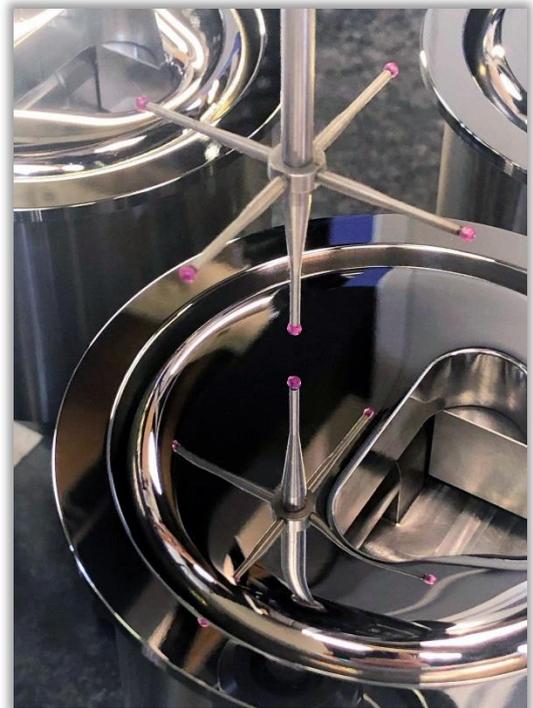

The cruise ship will access remote wilderness shores around the globe that are inaccessible to large cruise vessels. Coral Geographer is Australian flagged and crewed to deliver Coral Expeditions high standards of quality, capability, safety, and environmental responsibility.

Built by Vard Vung Tau in Vietnam, the ship is equipped with Type D Straight Line Wipers and a 6000 Series Controller.

7516 4-Bar Helicopter Tie Down

Monitor's famous 7516 4-Bar Helicopter is the most popular choice for deluxe helideck installations.

Completely flush, these fittings are supplied with our painstakingly polished finish to perfectly complement the finest yachts.

A number of premier projects have reached the stage where our fittings are installed, and we are working hard to make 2021 our busiest year ever.

Fabrications

This month, Hepworth Fabrications have begun supplying parts to a Midlands based manufacturer of Forklifts. The company has over 50 years of experience making forklift trucks and other warehousing equipment.

Having chosen to localise their supplier base for Fabricated parts, we aim to validate the benefits of this to our new client by upholding our commitment to quality & on-time delivery.

Rail Project

Hepworth Rail are starting a new overhaul project in April for the overhaul of the wiper systems fitted on the UK class 378 fleet of trains.

We have also received the first project with CAF in France that is for the RATP locomotive. Due to start delivering in May.

During March we received 7 new RFQ packages from various customers across the globe and we look forward to supplying our wiper and wash systems to our customers worldwide.
