Inmar International Boat Show in New Orleans

Our distributor in the USA Inmar Systems will be participating in the International Work Boat Show in New Orleans December 1-3, Booth1921.

London City Rosenbauer fire trucks

Our specialist wipers were featured on the Rosenbauer Stansted Airport fire trucks in The Thames Channel 5 Documentary with Tony Robinson.

Art Display Opening

The Connection art work by Luke Burton has been unveiled in Birmingham by the Lord Mayor and Ed James from Heart Radio did the presentation.

This project will be the world’s largest work of art with many installations. The Connection also aims to act as a network to bring people and communities together, working with a number of recognised charities.

The sculpture was conceived and designed entirely by Luke Burton, and Hepworth have been delighted to have played our part assisting the manufacturing for such a fantastic and worthwhile project.

Windy and Lurssen

Windy have delivered two custom built, ultra-modern tenders to a Lurssen built 142 metre Superyacht. The tenders have Monitor Marine Hatch handles and lifting points, while also sporting the Hepworth Pantograph performance wipers.

The yacht, will carry two heavily customised versions of the SR52 Blackbird onboard, lifted by cranes into the tender garage. With these tenders WINDY sets a new benchmark for what can be achieved in terms of our world class custom built superyacht-tenders.

Vivarail Climate Change Conference

The Vivarail train has been ferrying passengers and delegates out of Glasgow Central station for the COP26. Hepworth Rail have provided the train with out Pantograph wipers.

The finished train was achieved within 8 months, including testing and approvals. At the conference, Vivarail showcased the latest in battery train technology and removed any concerns that people may have had on unreliability, battery charging capability or mileage range. The Conference helped showcase the best of the UK rail industry to a worldwide audience and to be part of the solution for a greener railway.
