"It's not about ideas. It's about making ideas happen."

– Scott Belsky

1. William Sparling
2. 180' Burger Boat Motor Yachts
3. Contracts Secured - Denmark
4. MV Reef Endeavour
5. Canadian Navy
6. Fabrications
7. Montreal Light Rail

1. William Sparling

Bollinger Shipyards LLC has delivered the cutter William Sparling to the Coast Guard in Key West, Fla. The new cutter is the 180th vessel Bollinger has delivered to the Coast Guard over a 35-year period and the 54th fast response cutter (FRC) delivered under the current program. The new FRC will be homeported in Boston.

Inmar Systems supplied one triple and two twin Type C Straight Line wipers.

2. 180' Burger Boat Motor Yachts

Burger Boat Co. has announced that the superstructure has been set in place on the first of two 180' Motor Yachts.

The Burger 180 Motor Yacht features expansive interior and exterior spaces for its owner and guests, while its mechanical features are intended to make the cruising experience even more comfortable.

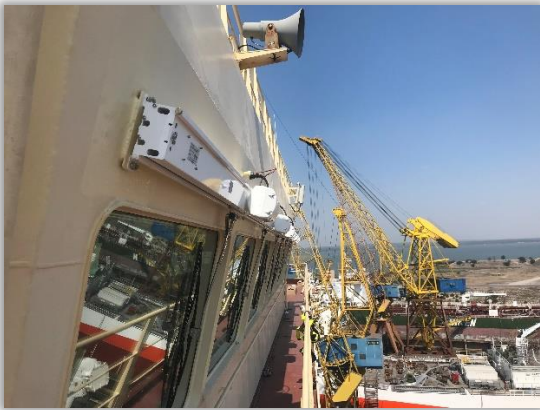

Onboard are three Type D Straight Line wipers with 8224 modules and a 6500 keypad.

3. Contracts Secured – Denmark

Our distributors in Denmark, Hans Buch, have secured an order from Maersk for replacement Sea Corp wiper systems onboard 7 ships. Each ship will have 19 Wynn Straight Line wipers installed, covering a total of 133 wiper systems.

Hans Buch have until now upgraded three vessels during dry dock and one during ship in operation and still have three to go.

This is a special case because the SeaCorp control systems are kept, with only the wiper systems being replaced. This means that our wipers are controlled by the existing SeaCorp control system, which naturally substantially reduces the cost and the time for installation.

4. MV Reef Endeavour

Marinair, our distributor in New Zealand, have secured orders to replace 2 x Type C Wipers on Fijian based MV Reef Endeavour.

Built in 1996 at Fiji Gov't Dockyard, Suva, Fiji. The vessel is a 3125 Ton, Ice strengthened Small Expedition Cruise catering for 130 passengers, 63 cabins, as part of the Captain Cook Cruise fleet, serving the South Pacific region.

5. Canadian Navy

Our Canadian distributor, North West Marine, have recently supplied the second of the Joint Support Ships.

The Joint Support Ships currently being constructed for the Royal Canadian Navy will be purpose-built, multi-role vessels that will provide an important auxiliary function to the Royal Canadian Navy. One of the most important aspects of these vessels is their ability to replenish naval task groups with marine fuel and other provisions while at sea. This allows the Royal Canadian Navy to operate away from port for longer periods of time. In addition to replenishment at sea, the vessels will support training and naval manoeuvres and humanitarian operations, ensuring Canada's continued safety and security at home and abroad.

The project has been supplied with - 21 x 70Nm and 2 x Type 1850 Pantograph wipers, 13 x Type D and 1 x type C Straight Line wipers, 8000 Control System and 5010 Wash System.

6. Fabrications

The Fabrications team have been making a range of new components for one of our clients in the Industrial Manufacturing sector. The parts we are supplying will be going into Test units, which will go into full production early next year.

The precision engineered part shown above is one of these components, it nicely showcases our superb CNC machining and Coded Welding capabilities.

7. Montreal Light Rail

Hepworth Rail wiper systems are on the Montreal Trains that have recently been displayed at REM's open house.

REM is the Montreal region's newest public transit network and has created a convenient and efficient way to travel for its citizens.
